

ImagePerfect™ 2118 Plus Blockout Banner (FR)

ImagePerfect™ 2118 Plus Blockout Banner is an effective blockout banner with a high level of print quality. It offers 100% opacity and double-sided printability. It has been specially created for digital printing on large-format inkjet printers and is suitable for printing with eco solvent and solvent inks as well as UV-cured and latex inks (with the exception of 3rd generation).

ImagePerfect™ 2118 Plus is an effective blockout banner with a very flexible and soft handle that incorporates a strong fabric. It offers a high print quality with remarkable text definition and a large colour gamut to ensure colourful images and vibrant area in-fills. IP 2118 Plus can be used for indoor and short-term outdoor applications such as billboards at trade shows and events, construction sites, show rooms, promotional campaigns and many other applications where a price-competitive blockout banner material is needed. The double-sided printability allows for double-sided placements but, in the event of such double-sided applications, it is essential that the print on the 1st side is completely dry before the 2nd side is printed, otherwise there can be issues with the media feed. Thermal welding allows for a strong seam, as does the use of ImagePerfect™ Seam Tack Tape. Laminate: ImagePerfect™ water-based liquid laminate with UV protection.

Please note: Albeit latex compatible, we would not recommend this product for use with latex printers that utilise 3rd generation ink.

Specifications	
Description	Laminated blockout banner
Colour	White matt
Thickness	360mym
Weight	450g/m ²
Tensile Strength	1300 / 1030 (N/5cm)
Tear Resistance	115 / 105 (N)
Temperature Range	N/A
Durability (unprinted)	3 years
Flame Retardancy	B1
Shelf Life	N/A
