

ImagePerfect™ 2594

Blockout Vinyl Polymeric (FR)

ImagePerfect™ 2594 is a white gloss vinyl with a very high level of opacity for the creation of digital prints with light barrier, blockout functionality. It is used for digital printing on large-format inkjets and is suitable for printing with ecosolvent and solvent inks, as well as UV-cured and latex inks.

ImagePerfect™ 2594 is a white gloss polymeric vinyl with a 100% blockout system for applications with complete opacity. It can be used on flat surfaces (indoor and outdoor), such as display cases, shop windows, glass doors and panels and vehicle surfaces, all with no showthrough. In conjunction with an additional product to form the second surface - eg reverse-printed IP 2593 Clear Window Film - it can also be used for double-sided applications, such as those on the glass sides of escalators, which would then manifest double-sided messaging with no showthrough from 1 side to the other. It is also ideal for application over existing decals and for promotional advertising on busses, trains and trams. The removal of some installations will be facilitated with heat. Laminates: IP 2810-103, IP 2810-202, IP 2830-109, IP 2830-200, IP 2830-104, etc.

Attention: Please make sure the printed IP 2594 is completely dry before laminating. Before the IP 2594 is applied, the surface should be completely cleaned. The use of IP Surface Cleaner (MIP1000) and the lint-free, IP Surface Cleaning Cloths (MMS8373) is a good match component cleaning solution to ensure that the surface is dry and free of dust and grease.

Specifications	
Description	Polymeric blockout vinyl
Colour	White gloss
Thickness	160mym
Weight	N/A
Adhesive	Acrylic, permanent
Adhesive Strength	12N/25mm (Finat TM 1/24h)
Release Paper	PE-coated silicone paper, 140g/m ²
Temperature Range	-40°C to +80°C
Durability (unprinted)	5 years
Flame Retardancy	B-s1, d0
Shelf Life	2 years, 20°C / 50% humidity
