

# ImagePerfect™ 2607

## Backlit Film

**ImagePerfect™ 2607 is a translucent, semi-rigid product for backlit applications. It has been specially created for digital printing on large-format inkjet printers and is suitable for printing with eco solvent and solvent inks as well as UV-cured and latex inks.**

ImagePerfect™ 2607 is a translucent product for backlit applications. It is ideally suited for indoor backlit use in illuminated sign boxes at railway stations, bus stations and airports, as well as all kinds of point-of-sale and retail applications. It incorporates a specially-coated polypropylene film that guarantees even light distribution and translucence for optimum impact (day and night). It is important to ensure that the print is completely dry before being used in a lightbox. This product will perform well at high print speeds that can otherwise be problematic for some backlit products. Laminate: IP 2810-101, IP 2830-200.

Important laminate recommendations: As a direct result of the internal temperature changes when lightboxes are powered on/powerd off (in use/idle), humidity levels can rise inside the lightbox and this humidity can condense into moisture. In turn, this can cause the backlit film to stick to the polycarbonate/glass sheets that are used as part of the lightbox construction and this can have the effect of 'melting' the print. To avoid the backlit film from sticking to the polycarbonate/glass sheets, therefore, we would recommend that it should be overlaminated.

Specifications	
Description	Polypropylene
Colour	White translucent
Thickness	230mym
Weight	235g/m <sup>2</sup>
Temperature Range	-10°C to +55°C
Durability (unprinted)	N/A
Flame Retardancy	N/A
Shelf Life	1 years, 20°C / 50% humidity
