

# ImagePerfect™ 2912

## Semi-Rigid Display (FR)

**ImagePerfect™ 2912 is a clear, gloss, semi-rigid display material that has been specially created for digital printing on large-format inkjet printers and is suitable for printing with eco solvent and solvent inks as well as latex and UV-cured inks.**

ImagePerfect™ 2912 is a semi-rigid, clear PET that should be utilised where a clear film with excellent print characteristics is required for all kinds of display applications. It should be printed on the reverse side such that, in application, the back of the product forms a protective barrier in front of the printed image. It can be used stand-alone if a display option is required with a high level of clarity or, otherwise, the aesthetic value of the printed output can be enhanced via the lamination (on the backside) with a self-adhesive product such as a white opaque (e.g. IP 2503 Pro), a white translucent (e.g. IP 2516), a crystal film (e.g. IP 7804) or a mirror film (e.g. IP 6504). For architectural applications, the printed product can be sandwiched between 2 panes of glass whereupon it will deliver high levels of transparency in the non-printed areas and a vibrant backdrop in the printed areas.

Specifications	
<b>Description</b>	Semi-rigid PET
<b>Colour</b>	Clear gloss
<b>Thickness</b>	200mym
<b>Weight</b>	280g/m <sup>2</sup>
<b>Temperature Range</b>	-10°C to +55°C
<b>Durability (unprinted)</b>	N/A
<b>Flame Retardancy</b>	B1
<b>Shelf Life</b>	2 years, 20°C / 50% humidity
