

ImagePerfect™ 2916

Pop-Up Display Silver Back

ImagePerfect™ 2916 is a white, matt display material with a silver back and excellent layflat properties for use in pop-up systems. This product has been specially created for digital printing on large-format inkjet and is suitable for printing with eco solvent and solvent inks as well as UV-cured and latex inks.

ImagePerfect™ 2916 has a silver back and excellent layflat properties, with its rigid nature making it an ideal choice for use in pop-up systems, as seen in retail locations, conference centres, exhibition halls and lifestyle business locations (such as hotels, casinos, sports arenas, etc). The silver back gives the product additional opacity for applications in which a 100% blackout effect is required and it also adds aesthetic value to the product, with the colour harmonising with most pop-up systems, presenting a match-component, bespoke look. This material can be used in conjunction with self-adhesive, 12.5mm magnetic strips (MAGHCM51930) to allow for easy attachment to the pop-up frame. Due to the multi-layered nature of the product, it is not suitable for score cutting. Important recommendation: To protect the printed surface from abrasion, dirt or humidity, and to also provide additional body and rigidity, we would recommend the use of a filmic overlaminate. The IP 2916 must be completely dry prior to application of the laminate. Laminate: IP 2830-200.

Specifications	
Description	Multi-layered PET pop-up media
Colour	White matt
Thickness	290mym
Weight	405g/m ²
Temperature Range	-10°C to +55°C
Durability (unprinted)	N/A
Flame Retardancy	N/A
Shelf Life	2 years, 20°C / 50% humidity
